All information should be centered horizontally between the margins as shown, and sections spaced evenly between the top and bottom one inch margins. NOTE: Because the length of your title and number of faculty will fluctuate, your title page spacing needs to be adjusted so that the blank spaces above and below each section are as close to the same size as possible.

The title must be in mixed case letters, double spaced, and located one inch from the top edge of the page. If the title is longer than six inches, it must be split and placed on two or more lines, with the first line being the longest and subsequent lines shorter (inverted pyramid style).

The title must be the same font and size as the body of the work; no bolded text, no large font, etc. All font needs to be serif.

The spaces above and below your name are centered vertically between the title and the section that begins with "A thesis submitted..." or “A dissertation submitted…”

The name in the separated boxes in the publication details section in GradProg is the name your thesis/dissertation will be published under. It is recommended that the name you want to publish under is the name used in the document. Your name must match on the title page, copyright, and abstract; ex: if your middle name is used in the publication details, the recommendation is to include your middle name on document.

Begin the statement with the formal introduction “A thesis submitted to…” or “A dissertation submitted to…” Write out the full university name as “Brigham Young University”. Make sure the line beginning with “in partial fulfillment…” is all lowercase. There should be one blank, double spaced line in between the line that starts with “in partial fulfillment…” and the degree type. Write out the full name of the degree.

List your committee chair and members, one per line. Do not use titles or degree abbreviations after names such as Dr., PhD., or EdD. The committee chair should be listed first with “, Chair” after their name. Abbreviated names need a period.

The department name and university name are double spaced. Most department names start with “Department of…” with some exceptions (ex: College of Nursing, School of Technology, Neuroscience Center, etc.)

Add the copyright information including the current year and your name. The first letter of every word in the copyright section should be capitalized. “All Rights Reserved” should be one inch from the bottom edge of the page. The copyright lines should be double spaced. NOTE: The copyright symbol can be added by pressing Ctrl+Alt+C (PC) or Option-g (MAC)

SAMPLE PRELIMINARY PAGES

This abstract encompasses the thesis in its entirety. Each chapter should have its own abstract section.

All text is in the same font and size as the rest of the paper. Font should be serif. There should be 1" margins on all 4 sides of the page.

The whole abstract page should be single-spaced.

The word "ABSTRACT" (all caps) should begin 1" from the top edge of the page. A single-spaced blank line should follow.

The title of your work on the abstract should match the title of your work on the title page (inverted pyramid format, mixed case letters, centered), except that it is single-spaced on this page.

After a single-spaced blank line, type your name as it appears in the publication details, title page, and copyright. On the next line type the title of your department followed by ", BYU". Then, on the next line type the full name of your degree. All text up to this point is centered.

After a single-spaced blank line, begin the body of the abstract. All text from this point on is left aligned. The first line of each body paragraph is indented. There should be a single-spaced blank line in between the body paragraphs. One body paragraph is required, but multiple body paragraphs is allowed.

Students should ensure that the keywords are listed at the bottom of the abstract so that the top and bottom margins are equal (both 1"). Keywords are left aligned without indentions. The "K" in "Keywords" is capitalized. Only keywords that are proper nouns are capitalized. The keywords should be single-spaced if there are multiple lines.

ABSTRACT

Outcomes and Therapeutic Alliances in Senior Citizens Served in a Community Mental Health Setting

David A. Hill
Department of Plant and Wildlife Sciences, BYU
Master of Science

The abstract is a summary of the work with emphasis on the findings of the study. It must be single spaced. It must match the same font and size as the rest of the work. It should also be left aligned with the 1st line indented. The abstract precedes the optional acknowledgement page and the body of the work.

This is where a second paragraph begins if applicable. An extra line should be included between the paragraphs.

SAMPLE PRELIMINARY PAGES

Keywords: mental health, senior citizens, therapeutic alliances, community, outcomes

The acknowledgements page is optional. All text is in the same font and size as the rest of the work. There should be 1" margins on all 4 sides of the page. We recommend double spacing this page.

The words "ACKNOWLEDGEMENTS" (all caps) should begin 1" from the top edge of the page and be centered. It can be spelled "acknowledgements" or "acknowledgments" as long as the spelling is consistent between this page, the table of contents, and the bookmarks.

On the next line down, the text of the acknowledgements begins. We recommend double spacing and left aligning each paragraph. We also recommend indenting the first line of each paragraph. The acknowledgements can be as long or short as you would like

The abstract and acknowledgements can both be more than one page long, which will need to be reflected in the table of contents page numbering.

ACKNOWLEDGEMENTS

This page is optional. Students may use the acknowledgements page to express appreciation for the committee members, friends, or family who provided assistance in research, writing, or technical aspects of the dissertation, thesis, or selected project. The acknowledgements should be simple and in good taste.

This is where the second paragraph begins if applicable.

SAMPLE PRELIMINARY PAGES

All text is in the same font and size as the rest of the work. There should be 1" margins on all 4 sides of the page.

We recommend double spacing and including links to the correct pages in the document (hyperlinks). The table of contents can be more than one page, but be sure to reflect that in the page numbering.

All preliminary page numbers are roman numerals. The title page, abstract, and acknowledgements are included on the table of contents with page numbers even though they do not have page numbers on the actual pages. Every page from this point on should have a page number on the actual page. The page numbers need to be centered at the bottom of the page. The font and size of the page numbers needs to match the rest document.

Page numbering starts over on the first page of the text, which is usually the introduction. From that point on, page numbers need to be Arabic numerals.

"Table of Contents" should be at the top of the page. It can either be in all caps or mixed case letters. If mixed case is used for "Table of Contents", it should also be used for "List of Tables" and "List of Figures" if those are included in the document. The same rule goes for all caps.

We recommend you include the title page, abstract, and acknowledgements in the table of contents. Note: Required to include the title page, abstract, acknowledgements, list of tables, and list of figures in the bookmarks). The list of tables and list of figures need to be included in the table of contents.

Your table of contents may be formatted differently than this sample. That is acceptable as long as formatting remains consistent throughout the table of contents, list of figures, and list of tables, etc. Formatting also still needs to meet the requirements discussed above.

SAMPLE PRELIMINARY PAGES

All text is typed in the same font and size as the rest of the work. There should be 1" margins on all 4 sides of the page.

We recommend double spacing and including links to the correct pages in the document (hyperlinks). The list of figures can be more than one page, just be sure to reflect that in the page numbering.

Should have a roman numeral page number on this page. The font and size for the page number on the list of figures page need to match the font for the rest on the document, including font size.

Your list of figures may be formatted differently than this sample. That is acceptable as long as formatting remains consistent throughout the table of contents, list of tables, and list of figures, etc. Formatting also still needs to meet the requirements discussed above.

SAMPLE PRELIMINARY PAGES

All text is in the same font and size as the preliminary pages.

Text is single spaced before the word "ABSTRACT" and double spaced starting with the word "ABSTRACT"

"CHAPTER #" (all caps) should begin 1" from the top edge of the page. A single spaced blank line should follows.

The title of your work on the first page of each chapter should match the title of your work on the title page (inverted pyramid format mixed case letters centered) except that it's single spaced.

After a single-spaced blank line, list the authors of the chapter. After another single spaced blank line, type the name of your department followed by ", Brigham Young University, Provo, UT." On the next line type the full name of your degree. All text up to this point is centered.

After a double spaced blank line type the word "ABSTRACT" (all caps and centered). On the next line type the name of your subheading (mixed case letters and left aligned). All text from this point on is left aligned with the first line of each paragraph indented.

All chapter names ("CHAPTER #") and section headings (ex: "ABSTRACT") should be in all caps and centered. All subheadings should be in mixed case letters and left aligned.
